SUMMARY

Frontend Engineer working at the intersection of engineering and design. Building scalable, user-focused web applications. Experienced with Next.js and React, including work on AI-powered applications and focusing on clarity and long-term maintainability.
Strong design sensibility from an architecture background, bridging visual clarity and engineering reliability.

PROFESSIONAL EXPERIENCE

Frontend developer │ Nov 2024 - Now

Aigen Co.,ltd, Thailand

- Built and maintained complex Next.js features for an AI chatbot platform, especially the interaction workflows.
- Integrated AI-generated outputs into user-facing interfaces, collaborating closely with backend and ML teams.
- Designed reusable component systems, custom hooks, and state logic, significantly improving developer experience and reducing UI bugs.
- Contributed to product discussions by balancing technical feasibility, UX clarity, and scalability.

Personal goal pursuit & Training │ Mar 2024 - Nov 2024

Frontend developer │ Jan 2023 - Mar 2024

Sirisoft Pub Co.,ltd, Thailand

- Developed enterprise web applications for banking clients, primarily using Angular.
- Collaborated with backend and performance teams to deliver secure, reliable, and maintainable systems.
- Gathered requirements, designed user flows, and created fully functional prototypes to align stakeholders before development.
- Worked closely with design and backend teams to translate requirements into functional, user-ready interfaces.

SKILLS

- Frontend : HTML, CSS, JavaScript, TypeScript, React, Next.js, Angular, Tailwind, Bootstrap, MUI, ShadCn
- Backend / Platform : Node.js, Express, MongoDB, SQL, Firebase, Docker, C#, Supabase
- Tools : Figma, Framer, Webflow, Spline, Adobe Suite, Git, Jira, Jitter, Unity

---

EDUCATION

King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand │ 2017 - 2022

Architecture and planning

- GPA : 3.23
- Top 5 at architecture competition for Ramathibodi hospital, mahidol university. (Team / 2021)

Saint dominic school, Thailand │ 2011-2017

Science–Mathematics Program

- GPA : 3.60

EXTRACURRICULAR

Hackathon - Jitter motion design 2024

Interests - Creative coding, Content creation, Freelance web development, Game development, Art, Motion & Visual experimentation, Workout
